# RE-TESTING REGISTER FOR POSITIVE CLIENTS BEFORE ART INITIATION

Private Health Sector Project

## Instructions

- Keep the register in the ART/ PMTCT room
- Write the date the client presented to ART/ PMTCT clinic and re-tested for confirmation
- Write down the client MRN/ code number,
- Entry point- write the specific site the client is referred from; specific OPD, Specific ward, VCT, TB clinic, or from Pre-ART pool, and if the client come from other service point, please specify
- Re-testing: perform the HIV testing according to the national algorithm and register the results of all tests run with final result,
- If the re-test result is discordant to the reported result, new specimen shall be taken and sent to the lab for test. Finding of the lab test results binds the final result.
